Publicly Accessible Charging and Hydrogen Infrastructure Map

Private Charging and Hydrogen Infrastructure*

*There are < 100 hydrogen fueling positions in the bar chart.

Notes

Statewide charging/fueling positions include those that are under development, and operating.

Estimated transit and school bus charging and refueling infrastructure, are included in private infrastructure totals. School bus data represented in the dashboard reflects only CEC-funded projects. Additional data about school bus infrastructure can be found on the [CEC Funded School Bus Chargers dashboard](#), though there may be other infrastructure efforts outside of CEC's scope not captured here.

Data can be downloaded by clicking on the data download icon located on
