EV Realty opens Inland Empire truck charging hub with 76 ports and 9 MW of power capacity

Posted April 10, 2026 by Charles Morris (<https://chargedevs.com/author/charles-morris/>) & filed under Fleets and Infrastructure (<https://chargedevs.com/category/newswire/fleets/>), Newswire (<https://chargedevs.com/category/newswire/>), The Infrastructure (<https://chargedevs.com/category/newswire/the-infrastructure/>).

EV Realty (<https://chargedevs.com/?s=EV%20Realty>), has opened its flagship multi-fleet truck charging hub in San Bernardino with 76 high-power charging ports and 9 MW of capacity, sufficient to serve over 200 medium- and heavy-duty trucks per day. The site is designed to serve all makes and models of medium- and heavy-duty trucks with both CCS and MCS charging ports.

The site is strategically located near the San Bernardino Intermodal Facility, in an area that is home to nearly 17,000 medium and heavy-duty trucks. It sits near Interstates 10 and 215, along a major freight lane from the Ports of Los Angeles and Long Beach.

The site is purpose-built for logistics operations—technology and operational design choices have been informed by fleet customers. Charging hardware from [Kempower](https://chargedevs.com/?s=Kempower) (<https://chargedevs.com/?s=Kempower>) allows charging at up to 1.2 MW with MCS and 500 kW with CCS. Software and fleet management tools powered by [Synop](https://chargedevs.com/?s=Synop) (<https://chargedevs.com/?s=Synop>) provide power management, reservations, reporting, and fleet insights on cost, range and efficiency. On-site staff, security, parking and on-site amenities are available 24/7.

(<https://chargedevs.com/wp-content/uploads/2026/04/5-scaled-1.jpg>)

Announced customers include national carrier J.B. Hunt Transport, beverage distributor Gate City Beverage, and Nevoia, a fully electric carrier.

"The Inland Empire is where freight from the Ports of Los Angeles and Long Beach gets sorted and sent across the country by truck and rail," said EV Realty CEO Patrick Sullivan. "Fleets operating here are doing some of the most important and demanding work in the supply chain. They need reliable and affordable access to high-power charging so that they can move beyond pilots and make electrification a real business decision. That's exactly what we've built here."

"EV Realty has been a great partner for us. Their unique design and business model allows carriers like us to optimize our operations with cost-effective charging and logistics solutions," said Nevoia Chief Commercial Officer John Verdon. "The opening of this site provides valuable operational flexibility with both megawatt charging and vehicle domicile options that work well for our needs."
