Waste from outside of San Bernardino County		X	
Televisions, computer monitors or other devices containing a Cathode Ray Tube (CRT) at sites without a scale house		X	

* More info on the safe disposal/recycling of this material is available here: [County Fire Electronic Waste Flyer](#); If you are unsure, please call the SWMD office, (800) 722-8004.

Asbestos

Asbestos Containing Waste (ACM) contains 1% or more asbestos, as determined by a testing method called Polarized Light Microscopy. When dry, ACM is considered friable if it can be crumbled, pulverized, or reduced to

Non-friable ACM is divided into two categories:

- * Category I – Asbestos-containing resilient floor coverings (like vinyl asbestos tile), asphalt roofing products, packings, and gaskets. These materials rarely become friable because the asbestos is locked securely into the material.
- * Category II – All other non-friable ACMs. These are more likely to become friable because they are not as resistant to crushing or pulverizing.

Asbestos Disposal

- * All burnt structures require certification, regardless the age.
- * All pre-1984 demolished structure waste require certification to be accepted in any of our landfills and/or transfer stations.
- * All post-1984 structures are assumed to be asbestos free and are therefore accepted without certification.
- * Friable Asbestos is accepted **only at the following locations:**
- * Antelope Valley Landfill, Los Angeles County (661) 947-7197
- * Bishop Landfill, Inyo County (760) 873-5577
- * Lassen Co/Bass Hill Landfill, Lassen County (530) 252-1273
- * Ridgecrest – Inyo Kern Landfill, Kern County (805) 327-2111
- * Azusa – Azusa Land Reclamation (626) 334-0719

E-Waste Collection
